Objective

FAST NUCES Computer Science undergraduate passionate about technology, aiming to apply skills in a dynamic internship setting.

Education

BS Computer Science

FAST NUCES, Pakistan

Expected Graduation: June 2026

Skills

- **Languages:** C++, Python, SQL
- **Databases:** MySQL, MongoDB, Oracle Database Design
- **Machine Learning:** Scikit-learn, Pandas, NumPy,
- **Tools:** VS Code, Jupyter Notebook
- **Soft Skills:** Problem-solving, teamwork

Projects

- **Hospital Management System:** Full-stack web app using Node.js, React, MySQL for patient and admin management.
- **Car Rental System:** OOP project featuring vehicle registration and rental tracking.
- **Bank Management System:** Data structures project for account and transaction management.
- **Housing Price Prediction:** Predicted California housing prices using a custom neural network built with NumPy and Pandas.
- **Digit Classification:** Built a Classified handwritten digits from scratch using a neural network.

Experience

Teacher's Assistant

FAST NUCES, Fifth Semester

Assisted with course delivery.

Debugging Module Co-Head

Developers Day, FAST NUCES, Sixth Semester

Prepared problem statements and test cases for real-world code debugging challenges.

Certifications

Neural Networks and Deep Learning

Coursera Certification

Supervised Machine Learning: Regression and Classification

Coursera Certification

SQL

Aptech Certification

Extracurricular Activities

- Participated in competitive programming and code sprints.
- Member of student societies, organizing events and activities.
